

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Anderson's Grammar-School History of the United States.

By JOHN J. ANDERSON, A. M., late Principal of Grammar School No. 31, New York City; Author of a Manual of General History, a Pictorial School History of the United States, etc., etc. Illustrated with more than 40 maps. Royal 16mo. 268 pages. Price \$1.20.

CHARACTERISTIC FEATURES.—1. The narrative is written with great clearness and conciseness, and is brought down to the present time. 2. Unimportant matters are entirely omitted, or only incidentally alluded to. 3. The history and the geography are taught together. 4. The book is fully supplied with Maps, and the location of every place mentioned is accurately shown. 5. All the proper names are accurately pronounced in connection with the names as they occur. 6. The plan affords frequent and systematic reviews by topics. 7. Two entirely different sets of questions run through the book. 8. It contains the Constitution of the United States, with full explanations and class-exercises. 9. It contains Washington's Farewell Address. 10. It contains, at the close of the book, a complete *résumé* of the whole history, arranged for topical study and recitation. 11. It contains but 260 pages. 12. It is sold at a moderate price.

The publishers believe that teachers who are tired of the cumbersome histories of our country now largely in use, and desire a book with which they can produce satisfactory results, will find that this work will exactly meet their wants.

"DEPARTMENT OF PUBLIC INSTRUCTION,

Superintendent's Office, City of New York.

"I have carefully examined Anderson's Histories, adopted by the Board of Education, and used in the Public Schools of this city, and cheerfully commend them to the favorable regard of teachers and school officers, as well adapted to the purposes of instruction in this branch of study, and as excellent and comprehensive compendiums of the leading events of history.

"S. S. RANDALL, *Sup't of Schools.*"

"Anderson's Histories have been in use in the Grammar Schools of this city from the date of their publication, and, as far as I know, have given the highest degree of satisfaction. They are written in a clear, concise style, are unusually accurate, and abound in exercises which only a practical teacher could have constructed, and which make them invaluable *Class Manuals*. They can scarcely fail to prove acceptable wherever practically tried.

"HENRY KIDDLE, *Ass't Sup't of Schools.*"

From Fifty-seven Principals of Grammar Schools in the City of New York.

"We are using Anderson's Histories in our schools with complete success. For class-room instruction they are, we believe, superior to any other works on the subject with which we are acquainted."

Anderson's Manual of General History.

Being an Outline History of the World from the Creation to the Present Time. Fully illustrated with Maps. By JOHN J. ANDERSON, A. M., late Principal of Grammar School No. 31, New York City; Author of a Grammar School History of the United States, and of a Pictorial School History of the United States. 1 vol. 12mo. 420 pages. Price \$2.

CHARACTERISTIC FEATURES.—1. The latest authorities have been consulted; and the narrative, which is written with clearness and conciseness, is brought down to the present time. 2. Unimportant matters are entirely omitted, or only incidentally alluded to. 3. The book is supplied with twenty-three maps, several of which are elegantly colored; and on these the location of every important place mentioned is accurately shown, and the successive revolutions in the different nations of Europe and Asia clearly delineated. 4. The pronunciation of all the proper names is accurately given in connection with the names as they occur; and a pronouncing index is added, by which the whole subject may be reviewed by topics. 5. The plan affords frequent and systematic reviews, both according to the chronology and by topics.

COLLEGE OF THE CITY OF NEW YORK, *New York, March 21, 1869.*

"From such examination as I have been able to give the Manual of General History, by John J. Anderson, A. M., I have formed the following opinion as to its merits: Its plan is comprehensive and judicious. The details are carefully chosen, and presented with clearness and accuracy. Superfluous and tedious matter is excluded; yet nothing of importance and within the grasp of young pupils is passed over in silence. At the same time, I would not hesitate to make trial of it as a syllabus or framework for the more ample and minute inquiries of a college course. As a collection of facts to be committed to memory by students, whether of the higher grade or the lower, it appears to me to be superior to any other school-book on the subject. It is particularly worthy of praise for its coming right down to the present time; and it is altogether the work of a highly intelligent teacher for intelligent scholars. To both these classes of persons I heartily recommend it.

"CHARLES E. ANTHON,

"Professor of History, etc., College, City of New York."

From Prof. THOMAS EMERSON, Principal High-School, Woburn, Mass.

"Your Manual of General History has already been introduced into our High-School, and subjected to the only real test of the merits of a book—daily use in the class-room. It is the best compend of general history I have yet seen. In the general division of the subject, in the choice and arrangement of the details, in the clearness and simplicity of the language, in the omission of the endless and uninteresting minutiae with which many text-books on this subject are cumbered, you have been highly successful. Unlike most compends of history, the narrative is well connected and pleasing, thereby attracting rather than repelling the student. Nor are the maps among the least valuable features of the book. You have fully recognized the principle that the study of History and Geography should go hand in hand. . . . It is extremely gratifying to find a book that furnishes the pupil with the leading facts of history in so attractive a manner, and leaves to the teacher so large an opportunity for oral instruction."

DEPARTMENT OF PUBLIC INSTRUCTION,
SUPERINTENDENT'S OFFICE, 146 GRAND STREET,
NEW YORK CITY.

THE undersigned cheerfully recommend Mr. J. HENDERSON'S new edition of Test Words for Spelling as a very useful and valuable Compend for the use of Schools, in this Department of Instruction, and as worthy of adoption by teachers generally.

It comprises a very large and well-selected collection of words, adapted especially to the use of those desirous to improve themselves in the art of spelling.

S. S. RANDALL, *City Superintendent*
HENRY KIDDLE, *Assistant*

Entered according to Act of Congress, in the year 1869,

BY CLARK & MAYNARD,

*In the Clerk's Office of the District Court of the United States for
Southern District of New York.*

TO TEACHERS.

IN this edition, a list of short words, in common use, and from their resemblance in sound liable to be misspelled, with brief sentences illustrating their meaning, has been added.

It should be borne in mind, that the successful teaching of spelling is more an exercise of the eye than of the ear; therefore the compiler deems it essential in the use of this book, that each scholar should have a copy, that he may become familiar with the appearance of words he will be called upon to use.

N. P. HENDERSON

NEW YORK, *May*. 1869.

TO TEACHERS.

IN the following list, words containing similar, or nearly similar sounds, produced by different combinations of letters, will be found associated together.

The Compiler was led to the work of arranging words in this manner by the discovery of the fact, that his scholars acquired but little proficiency in spelling, by committing to memory extensive columns of words of the same character in form and sound.

Rules for spelling are so little calculated to throw light upon many of the irregularities in English Orthography, that the Compiler was induced to believe that the system adopted by him would prove beneficial.

He has had his plan in operation during the past year, and the results have been of the most gratifying character. This list is now offered to teachers for their inspection, with the hope that it may meet with their approval.
